audioBOX

Your Perfect Accessory
for Digitalized Classroom Environment and Language Learning

Audio Box

Audio Box ST-AB 203 which contains a built-in USB sound card is designed to enhance sound quality for effective language learning with its side-tone generating function and noise reduction features.

Since computers in each lab may have different configurations, the sound quality of each computer may vary. Audio box ST-AB 203 could assist you to standardize the hardware specification for sound so that you could manage and control the sound quality of each computer easily.

Besides, by adopting Audio Box ST-AB 203, you could plug in headsets or USBs easily instead of reaching around at the back of PCs since you can put it wherever it is convenient to you.
