Newsletter Vol.12 (October 2010)

As one of the leading education technology developers in the world, Sun-Tech always keeps moving forward and strikes for improvement and innovation. We are proud to inform you that there will be 3 brand new features in our XCLASS EVO - the Lesson Reminder, the Lesson Recorder and the New Quiz Module.

The Digital Schedule and Organizer – Lesson Reminder

Organizing lessons and managing teaching activities are found to be a real hassle for most teachers. With our Lesson Reminder, information could be well managed. Lesson Reminder is a new feature embedded in XCLASS EVO, it can be used to schedule tasks and materials for lessons, besides, teachers can also track the progress of the lesson in real time. However, what makes the Lesson Reminder special is that it will "remind" you for whatever tasks you have planned. Alert message will be shown if a new session / new task is about to start so that teachers can always follow their planned teaching schedule and never miss any task during the lesson.

The New Digital Recorder – Lesson Recorder

Recording function isn't new in XCLASS, in the past you could also capture screen movements in XCLASS. However, the Lesson Recorder in XCLASS EVO can give you a whole new experience. Not only capturing teacher's PC screen, all the audio in teacher's PC can also be recorded! With the record, pause and playback function together with a webcam, the whole lesson could be recorded. The recorded lesson can be shown to any absent student so that they do not miss any lesson and able to catch up with the learning progress.

Transforming Tests to Digital Form – New Quiz Module

There will be no more question paper and answer sheet whenever teachers and students are using XCLASS EVO. The New Quiz Module will certainly bring evolution to the way that tests and quizzes can be done. XCLASS EVO contains a new quiz module which teachers can deliver quiz to students in digital form. Questions can be presented in different types such as Multiple Choice, Matching, Fill in The Blanks, and etc. With the auto-marking functions,

teachers' workload can be relieved significantly. Test report can also be generated so that students' performance can be recorded and assessed easily. With all the new and enhanced features, we believe that XCLASS EVO will be the most comprehensive classroom management software in the market.

Our Big Event – BETT 2011

With the success gained from last year, we have decided to participate in the world's largest education technology event again. We are pleased to announce that Sun-Tech will be exhibited in BETT 2011. It will be held on 12th -15th January 2011 at Olympia, London. During the exhibition, we will show you all the latest educational technology products from Sun-Tech; you can touch, feel, experience our products and have a face-to-face discussion with us. Please come and visit us in BETT 2011, we look forward to meeting you at our **Booth SW28**! For more information, please contact us at sales@suntechgroup.com.
