

What Is New for 2012 Interactive Devices?

Technology enhancement has always been improving our standard of living as well as quality of life. It has been quite a long time since we used traditional Whiteboard, Transparency Projector and Computer in teaching and learning. Nowadays, there is no doubt that **Touch Technology** has been widely adopted in every bit and piece of our lives. In fact, by having a touch interactive device, not only can it increase the concentration and participation of the audiences, one can also control the system and applications through a single touch. Given that we are one of the market leaders in education technology, we have observed the market trend and hereby proudly introducing our latest interactive devices- LCD TouchTV, Interactive Table and BoardWiz Portable. We believe that our latest series of interactive devices will definitely be able to meet different needs and requirements.

LCD Touch TV

It is no longer a dream to own a LCD Touch Monitor with TV function. By having our LCD Touch TV, you can simply operate your computer and TV through the touch of your fingers easily. Besides, our LCD Touch Monitor is equipped with the latest optical touch panel technology and it comes with High Definition Resolution (1920 X 1080), quick response time as well as top range of brightness and contrast ratio. Doubtless to say, our LCD Touch TV is an ideal solution that replaces your traditional computer monitors. It comes along with various dimensions, **from 32" to 65"** and it combines features of an interactive whiteboard and a projector. With the help of our LCD Touch TV, we believe that your presentation will become more interactive and effective.

Interactive Table

Interactive Table is a combination of a LCD Touch TV and a Personal Computer and it is designed to operate different applications on the table top. Sizes are available in **42" & 55"** or it can be **tailored-made** to suit individual needs or preferences. With its high angle view and quick response time, our Interactive Table is certainly one of the hottest interactive devices in the market and it is suitable for any occasion that requires a flat top usage.

BoardWiz Portable

BoardWiz Portable is a light and handy mobile interactive device which can transform a traditional whiteboard into an interactive whiteboard in the most economical way. It makes use of the latest Infrared and Ultrasonic technology and it is as simple as plug and play. Simply place it on a flat surface, you can get a projection screen up to **120"** and it also supports multi-operational system, including Windows 7, Vista, XP, Linux & Mac.

Latest Promotion
