

Together with the launch of our enhanced XCLASS, Sun-Tech has participated in several educational events in Hong Kong and China. During the events, we are pleased to meet our valuable customers and also receive many positive responses from different kinds of institutions and organizations.

### ***Promotional Events with Our Partners***

In May, we are pleased to join hand with our China sole distributor to exhibit in two important exhibitions – *The 57<sup>th</sup> China National Exhibition of Educational Instruments & The 9<sup>th</sup> Guangzhou Educational Instrument Exhibition*. In these exhibitions, it is nice to see that many visitors who are mainly teachers, principals and educational professionals have shown their interests in our products, it could help us have a better understanding about their demand regarding ICT Education through discussion.

Besides, we have also co-operated with Cypher Martin System Ltd. to hold the *3rd HK-Macau School Wireless Forum 2009* in Hong Kong & Macau respectively to share how our XCLASS Mobile and DLL Mobile help schools facilitate Mobile Learning. "With the help of XCLASS Mobile, I can easily manage my class even in a field trip which can arouse students' interest in learning," a representative of the pilot school said.

### ***Communication through Facebook***

With the increasing usage of Facebook globally, we reckon that it is a convenient and effective way to communicate with our distributors and customers. Hence, we are pleased to announce that we have set up our own business account there. We will upload our product information and current events periodically, so that our customers can keep being informed. Add [Sun-Tech](#) now!

### ***Online Learning Vs H1N1***

Owing to the widespread of H1N1 in Hong Kong, schools tend to use online learning platform to let students keep learning during this sudden school break. Our i-pol, Online English Learning Platform, fits in the current needs, resulting in a rising number of inquiry. We believe our products can meet up the demand, so that students can easily study at home while teachers can efficiently assess their students through the platform as well.

Finally, we would like to thank again for all your continuous support. Hope that you could get updated information about our current development and future prospect through this newsletter.

If you have any inquiry about our products, please feel free to contact our Sales Team at [sales@suntechgroup.com](mailto:sales@suntechgroup.com) for further information and product demonstration.
